

I had been experiencing chronic pain over 3 years on both my shoulders. I had ~~tried~~ several ~~and~~ remedies before like physiotherapy, acupuncture etc and ~~finally decided~~ when nothing worked, I met Dr Sivabramaniam (~~an~~ orthopaedic surgeon), at the Hindee Mission hospital at Tambaram. I was impressed with his willingness to trust my symptoms and not ^{just} what the MRI Scan report suggested. He agreed to investigate both shoulders, although the MRI didn't suggest anything serious ^{on the right shoulder} that required surgical intervention. After surgery which went for 4½ hours, Dr Sivabramaniam told me that the right shoulder was in fact much worse than the left, contrary to the MRI report. I'm glad that the surgeon took my inputs into consideration and agreed to fix the right shoulder also. Everything went smoothly and I've been recovering very well. I'd like to personally thank Dr. Sivabramaniam for his professionalism and willingness to listen to the patient's inputs. I also thank the Hindee Mission hospital staff for exceptional service rendered at a very affordable cost.
